BRICKWORK

Camadas de bricks repletas de nuances que nos relembram os tradicionais nova-iorquinos expostos nas fachadas centenárias: peças originais (7,5x45 cm), arestas irregulares e superfícies estruturadas que abrigam profundas destonalizações.

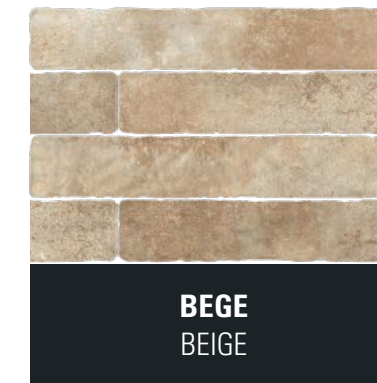

Layers of shaded bricks remind us of the traditional New York-style brickwork, exposed on the century-old facades: original tiles (7,5x45 cm), irregular edges and structured surfaces that shelter deep shades.

JUNTOS CUIDAMOS DO FUTURO

A **CINCA – Companhia Industrial de Cerâmica** detém uma forte consciencialização para a temática da preservação do meio ambiente, que se materializa na conceção, na produção e na manutenção do produto ao longo do seu ciclo de vida, incluindo no seu desmantelamento em fim de vida.

Por outras palavras, firmamos o nosso compromisso através da escolha de matérias-primas e de processos eficientes, com a otimização de recursos e análise dos impactos no meio ambiente, na comunidade e no mundo.

Mantemos uma grande preocupação com a eficiência dos nossos processos de produção, nomeadamente com a reciclagem dos subprodutos, a reutilização das águas usadas no processo industrial e no controlo da emissão de gases com efeito de estufa (CO2), sempre alinhado com uma política de economia circular.

A nossa preocupação com a eficiência energética é uma constante, investindo em equipamentos mais eficientes e monitorizando continuamente todo o processo.

TOGETHER WE WILL TAKE CARE OF THE FUTURE

CINCA – Companhia Industrial de Cerâmica has always had a strong environmental preservation and sustainable future awareness, which comes to light in the design, production, and maintenance of its product throughout their life cycle, including its end-of-life disassembly.

In other words, we undertake this through the choice of raw materials and efficient processes, with the optimization of resources and the analysis of impacts on the environment, the community, and the world.

We remain very concerned with our production processes efficiency, including the recycling of by-products, the reuse of industrial process wastewater and the control of greenhouse gas (CO2) emissions, always aligned with a circular economy policy.

Our concern with energy efficiency is relentless, investing in more efficient equipment and continuously monitoring the entire process.
